### 01 SELECTED WORK

#### UGC CAMERA 2026 - Present

Founder & Product Developer | UGCCamera.com

- Built a multi-tenant NFC/QR browser-camera and UGC platform from concept through production, including high-resolution capture, social-style framing, zoom/reposition interactions and native sharing.
- Owned product architecture, multilingual flows, responsive UX, real-device QA and edge-case debugging; invested 200+ hours refining camera behavior across mobile browsers.

#### MENUTAP 2026 - Present

Founder & Product Developer | Restaurant NFC table hub

- Built a Supabase-backed restaurant SaaS with authentication, database-driven menus, responsive admin/customer flows and NFC/QR publishing.
- Designed a one-tap guest experience for menus, Wi-Fi, Google reviews, games and social links; own architecture, QA, debugging and iteration.

#### FOODSPOT MOBILE Dec 2025 - Mar 2026

Founder & Product Developer | Multi-tenant food-commerce SaaS

- Built storefront, ordering, inventory and expense workflows with Mercado Pago, event creation, QR ticketing and vendor tools.
- Integrated UGC Camera into the post-purchase journey and debugged authentication, data-access and responsive flows across the stack.

#### INDEPENDENT MACOS APP SUITE 2026

AI-Assisted Product Developer | Native/local productivity tools

- Built iVoice, iOrganize and iBrain: local speech-to-text and translation, file cleanup/organization and offline AI workflows.
- Rapidly prototyped, tested and debugged macOS apps across permissions, hotkeys, local models and native desktop behavior.

### 02 HOW I WORK

#### FROM MESSY PROBLEMS TO WORKING PRODUCTS.

AI is leverage, not a substitute for product judgment. I understand the problem, ship quickly, then validate through real usage.

#### PROBLEM & RESEARCH

Understand the problem, research options and define the simplest useful solution.

#### BUILD & TEST

Build quickly, test on real devices and deliberately break flows.

#### DEBUG & SOLVE

Trace UI, auth, data and runtime failures with inspection, logs and device testing.

#### ITERATE & SHIP

Refine, optimize, ship and improve from real behavior.

### 03 TOOLS

#### DEBUGGING

Chrome Inspect - Safari Web Inspector - Vercel logs - Supabase / Edge Function logs

#### BACKEND / DATA

Supabase - SQL - APIs - webhooks - authentication

#### BUILD / SHIP

Vercel - Git - GitHub - responsive UI - NFC / QR

#### AI WORKFLOW

ChatGPT / Codex - Claude - Gemini - Perplexity - Ollama

### 04 EDUCATION + LANGUAGES

#### Green River College

Associate Degree - International Business & Marketing - 2015

English - Native / Fluent

Spanish - Native / Fluent

### 05 ADDITIONAL

#### Digital Impact - 2024-2025

Web, social-media and promotional marketing for local businesses.

#### Spines (AI) - 2025

AI-enabled publishing sales: product demos, customer advising and outbound calls.

### 06 THE AUTO BARBER Founder & Owner - Seattle - 2020-2025

SIX-FIGURE  
REVENUE

165+ FIVE-STAR  
GOOGLE REVIEWS

#### PREMIUM AUTOMOTIVE RESTYLING

Built and operated a premium automotive restyling business offering ceramic coatings, paint protection film (XPEL / XTEK), vinyl wraps, window tint and auto detailing. Led sales, marketing, operations, hiring and employee training.
